Product Ref: DsC10-0209)

Issue No: 02

Issued under the Health & Safety at Work Act 1974 (Section 6) and the control substances hazardous to Health Regulations 1988.

STORAGE

The product is supplied in cardboard cartons; care should be taken to ensure that these are stored properly to avoid damage to the contents. Heavy objects should not be placed on top as this can lead to damage or distortion. The cardboard packaging should be recycled via an approved waste recycling station.

HANDLING AND USE

Care should be taken when the product is being handled, gloves should be worn to avoid abrasions and irritation from any aluminium particles. If the product is to be cut, then a full risk assessment of the circumstances it is being cut in needs to be undertaken. As a minimum requirement respiratory protection a (factor of 3) (solids) should be worn (FP3S). If in any doubt, you should contact your PPE supplier immediately for advice.

FIRST AID

Eyes: Wash well with copious amounts of fresh water.

Skin: Wash well with soap and water.

If symptoms continue, seek medical advice.

WASTE DISPOSAL

Waste products should be consigned in accordance with:

The Environmental Protection Act (1990) section 34 (Duty of Care) Special Waste Regulations 1996.

All waste products require to be properly consigned in accordance with the Environmental legislation, if in any doubt you should contact your local office of the Environment Agency in England or the Scottish Environmental Protection Agency in Scotland.

Telephone numbers of the relevant authorities are listed under government agencies in the telephone book.

This data sheet cancels and supersedes all previous editions. The information contained in this data sheet is based on current knowledge and experience. The purpose of this data sheet is to describe the specific product in terms of safety requirements. It does not constitute a warranty with regard to the product's properties and/or performance in use.
