Lead replacement

Lite Lead is a self-adhesive aluminum flashing for use as a replacement for traditional lead sheet in all roofing and waterproofing applications.

Cost effective

Lite Lead is lightweight and versatile as well as being far more cost effective than lead sheet.

Zero theft

Lite Lead has no resale value and is therefore an effective deterrent against the costly and damaging results when traditional lead is stolen.

Non staining

Lite Lead does not require patination oil will not discolour or stain the roof when installed.

Non toxic

Lite lead is a non-toxic and environmentally friendly alternative to lead sheet.

Easily installed

Lite Lead is easily cut and installed offering reduced installation times and a labour cost saving.

Versatile

Lite Lead can be used for a wide range of roofing and waterproofing applications such as; flashings when installing solar panels, waterproofing under coping stones, as a saddle or apron on GRP valleys or for use as the valley itself when supported on boards. It is ideally suited for soakers, stepped and cover flashings, parapets, valleys, gutters, saddles, aprons, roof lights, around chimneys or many other applications. It can be used on any pitched or flat roof and is suitable in any domestic and commercial application.

Width	Length	Weight	Colour
150mm	5mtrs long	1.5kg	grey
300mm	5mtrs long	3kg	grey
450mm	5mtrs long	4.5kg	grey

Temperature range: -40°C...+90°C. Life expectancy: minimum 20 years.
