

## Headingley Carnegie Stadium

The Headingley Carnegie Stadium has undergone extensive redevelopment work with the construction of a new Carnegie Stand. Europanel was specified for the external wall of the new extension, thanks to its exceptional fire performance qualities and environmental credentials.

The new Carnegie Stand, built in partnership with Leeds Rugby & Leeds Metropolitan University, opened for the first time on Friday September 1st, 2006 for the Leeds Rhinos home game against Warrington Wolves.

Eurobond's Europanel system was specified in Corus Colorcoat® PVDF White 125mm and 86mm. The secret fix joint, coupled with the modular flexibility afforded by this unique panel system makes an ideal contribution to any high profile building.

Client: Leeds Rugby & Leeds Metropolitan University

Architect: DLA Architects

Contractor: Caddick Construction

Panel Contractor: Inbuild Ltd
