

**Little Clacton Pre-school,  
Essex**

**Product:** The Loweswater

**Size:** 4m x 4m

**Additional Options:** Frame finished in blue and the fabric roof chosen was indigo blue

**Contract Value:** under £5,000

**Little Clacton Pre-school** required a canopy for their pre-school that could be used all-year round and that would fit in with their surroundings.

The Pre-school manager contacted Able Canopies as they recently had a new building constructed and they now required a canopy to finish off the project. They required a supply only canopy as they had builders on site that would fit the canopy as part of their contract. Able Canopies install all of their canopies and shelters themselves but recently introduced supply only products to their portfolio.

A survey was completed and the pre-school manager was happy with the quotation that was supplied by Able Canopies and placed an order for The Loweswater.

The Loweswater was a new product added to the extensive range at Able Canopies and this was the first installation of the product.

The Loweswater free standing canopy is versatile, practical and easy to maintain. Fitted with Able shade sail cloth, the fabric offers extremely high levels of UV protection combined with strength and durability. Able Shade Sails are a cost effective solution for schools and nurseries; perfect for play areas enhancing the comfort and safety of children and staff.

The canopy was supplied and the builders installing the canopy found no problems with the product. The staff at the Pre-school were very happy with the end result.

***“The canopy has made a big difference to how we use our outside area and also added an attractive space for our children to play safely out of the sun and they can be outside in all weather conditions. Thank you for providing us with this lovely canopy.”*** - Pauline Green, Little Clacton pre-school Manager.
