

## RADIATORS

### At Kermi highest quality has first priority

Kermi sets a high standard of quality beginning with product development, through the selection of materials and strict testing to a demanding final inspection.

In addition to the CE logo, European DIN EN442 standard, RAL logo and an uncompromising quality assurance system certified in accordance with DIN EN ISO 9001:2008 and 14001:2004, the Kermi and Arbonia brands guarantee quality.

### The RAL logo guarantees the highest quality

Through the RAL quality assurance Kermi radiators guarantee extensive quality features far in excess of the standard.

Precise welding, pressure testing far in excess of the permissible operating pressure, high quality priming and a sparkling paint finish are additional RAL features that ensure safety and a brilliance.

5 year guarantee against manufacturing defect.

RAL logo guarantees the highest quality.

Heat emission in accordance with European standard DIN EN 442.

Accredited to DIN EN 9001: 2008 quality management system. Responsible environmental management according to DIN EN14001:2004.

Reliable product quality in accordance with EN 442.
