

## HELO CASE STUDY - SHAPES HEALTH & FITNESS CLUB

CLIENT: City of Stoke-on-Trent  
SITE: Fenton Manor Sports Complex  
PROJECT: Fenton Manor

Helo UK is pleased to announce the completion of The Fenton Manor for Shapes Health and Fitness Club in Stoke-on-Trent. The project comprised the refurbishment of an existing Health Suite.

Two Acrylic steam rooms and an old sauna were replaced with large, contemporary styled Herb sauna and Tiled steam room. Both rooms are open plan with large capacity suitable for the very heavy bathing loads in a popular leisure centre. Located on the first floor of the busy leisure centre the old rooms were removed and the new rooms built with minimal disruption within a tight time scale.

Continued overleaf:

**PROJECT: FENTON MANOR**

**A: Sauna**

The sauna has a large bather capacity with our European standard Abache triple tier benching. Five windows and a large DDA door allow light into the sauna. A Magma heater provides a comfortable radiant heat into the room with a huge stone capacity of 120 Kilos. Space is allowed for full wheelchair access.

**B: Steam room**

The steam room is contemporary designed with two simple shades of glass mosaic. Large bather capacity needed for a busy Local Authority Health Suite with easy disabled access.

**C: Etching**

Simple, clear etching was provided on the large glass DDA door.

**D: Sauna**

View of the sauna from the door entrance illustrates the size and clean lines of the room.
