

Welcome to the first CPS Bulletin for 2013.

2012 saw CPS grow above expectations and strengthen its presence on the international stage, working with companies in Australasia, The Middle East, United States of America and Africa. This year hosts the full launch of our Superlight Staging Board which reduces an Alu Rapid platform to less than 15kg with no compromise on load-bearing. Also as featured in the Bulletin we have the new Multipurpose Leg Casting which can accommodate virtually any leg up to 60mm making it a clear winner for events industry applications etc..

During 2013 CPS promises a continuous flow of new and innovative products from interactive learning space seating and stadium seating systems to trussing and rigging systems that will complement our comprehensive staging range.

CPS Embraces Eyeleds® Ultra Slim Stairlights

CPS now offers Eyeleds®, ultra slim LED walkover/plinth lights. These lights are only 6.5mm deep and specifically designed for providing visual illumination to walkways and staircases.

These small but effective lights help create stylish, upmarket teaching and learning environments for Auditoriums, Business Schools and Lecture Theatres with very little extra work needed.

For further information on the full range please contact us.

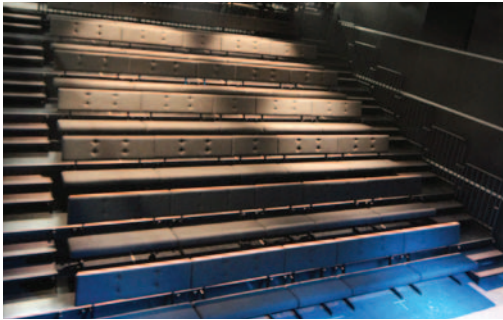

Multipurpose Leg Casting Launched

A new state of the art leg casting is now available for the Alu Rapid platform.

The casting allows for and accommodates, a multitude of different leg profiles whether they are round or square.

This means that you can purchase new platforms and utilise your existing stocks of legs.

Demountable Seating

Demountable Seating that is ideal for multi-purpose venues.

CPS supply a wide range of demountable seating systems into many multipurpose venues where the use of flexible floorspace is high priority. Demountable staging products are used for the structure of the systems and wide range of seating options are available. For further information and advice please contact us.

Desking with a difference

Want to know how to transform an ordinary lecture theatre into an eye-catching master piece?

CPS can supply bright desk edging which at minimum cost gives your Lecture Theatre a crisp sharp look, brightening the atmosphere of the room and creating a better learning environment.

Leading UK universities have utilised this simple but effective design, especially when larger lecture theatres are required, adding character, vibrancy and individuality to a room that would otherwise have been uninspiring in appearance.

New Appointment

CPS is privileged to have on board Sales Executive Stephen Love BA (Hons) who enthusiastically joined the team at the start of this year. CPS will be drawing on his experience of different markets to help continue the growth, you will be seeing and hearing more from him shortly, if you haven't already!

Customer Feedback

I would like to take this opportunity to thank you and your colleagues involved for pulling out all the stops to deliver the right product, for the right price, at the right time, with zero defects. It's reassuring in the current construction industry climate to still find companies who actually subscribe to their sales pitch without sacrificing the quality of workmanship, end product or health and safety. I am delighted to be working again with you on our next project.

University Project Manager

CPS were a pleasure to deal with! Thank you for understanding our Client. Confidently, it is much appreciated.
