

Welcome...

The 2nd CPS Bulletin for 2013

After an extremely busy start to the year, we are pleased to announce the arrival of some new exciting and innovative products which we touch on briefly in this issue.

Our comprehensive website has recently been updated with many recent projects and we would recommend a fresh browse.

As always, we'd love to hear from you, whether your requirements are for thousands of seats into a new build project or a simple staging system to purchase or rent for an event.

CPS Launches New Range of Spectator Seating

Following the successful completion of both spectator and pool side stadium contracts, CPS have launched a full range of Spectator Seating Systems earlier this year.

The range includes entry level products such as the backless seat pod through to more luxurious and comfortable auto-tipping models which can be either floor or riser mounted.

For further information, a no obligation quotation or a visit with samples to discuss your requirements in detail, please contact us. Information can also be viewed online at www.cpsmanufacturingco.com

Rapid Lock System

The new Rapid Lock system designed for the Alu Rapid staging platform totally eliminates the need to use the Klemfix staging connectors, this makes assembling and dismantling the stage much quicker and easier. Operated from the deck surface, it is the ultimate solution for bespoke stages that are designed to fit into set areas such as orchestra pit infill's etc.

CPS Supply the Hallé Orchestra with a Bespoke Staging Solution

The Hallé Orchestra have recently opened their new St Peter's practice base in Manchester. They have very successfully managed to renovate an old church into an impressive state of the art performance hall.

A custom built demountable stage was needed that fitted in with the architecturally ornate setting, and CPS were chosen to design and supply the staging. The Stage was fitted with a high class, hardwearing Karndean flooring finish which matched the surroundings. The Stage utilised bespoke Alu Combi and Alu Rapid platforms that were built around pillars, displaying how the different ranges can be combined together to create a truly perfect stage.

AIRO Acoustics & Noise Control

The Asset Auditorium Range has now been accredited with the AIRO Acoustics and Noise Control, an exciting development for CPS. This means that the Asset range effectively reduces sound and noise absorption, over against many other chairs which is a fundamental feature for any auditorium.

Interactive Lecture Theatre Seat

CPS has launched an extensive range of new Interactive Lecture Theatre seating systems.

The 'Swivel and Go' feature of the chair helps your pupils and students to interact with each other like never before. Further information on product choice and specifications will be released on our website and follow in our next edition.

Our sales team are willing to advise and guide on any project you might currently be working on.

CPS Complete Prestigious Auditorium

CPS has added another impressive auditorium to the list. The auditorium was installed in central London using our top specification seat, the Asset A30. LED aisle lights were used to illuminate the walkways and add character to the auditorium.

The design work involved some complicated processes, as the auditorium was built on a sloped floor with different tier heights and two rows of seats on each level, which in turn made each desk height different. The whole project demonstrated CPS's renowned ability to deliver a completely bespoke package, right, first time.

Customer Feedback

The school has used CPS for over five years. I have to say they are very professional and reliable. Every order we have asked for has been on time, the prices are the best, the quality of their equipment is top notch. Well done CPS.
