

SIVALBP® ADDS NEW COLOURS FOR 2016

As the exclusive UK distributor of Sivalbp®, Vincent Timber is pleased to announce the availability of two new colours with Vintage Chocolate and Vintage Black added to this growing range of pre-coated timber cladding.

A leading player in its field, Sivalbp® uses a variety of fully certified timber species, including European Douglas fir, Nordic Spruce, Siberian Larch and Western Red Cedar.

The manufacturing process, is quality control driven at every stage, through timber drying and selection, through grading, machining and the various innovative treatment and finishing processes, producing a unique end product that will stand the test of time.

Along with the new Vintage Chocolate and Vintage Black options for 2016, Sivalbp® comes in many other colours, including attractive shades of grey for a ready-weathered appearance - making the transition to the actual aged colour much less dramatic and more homogeneous.

Sivalbp® is an increasingly popular specification for residential and commercial facade projects, Sivalbp® is ideal for when an architect or designer wishes to combine attractive profile design with a pleasing aesthetic finish for a high performance façade.

Why use Sivalbp® coated claddings?

- Benefit from the quality of fully factory applied coatings
- Range of attractive profiles for all design requirements
- Available from a range of durable species
- Options include - pre-weathered grey, natural oiled and fully opaque
- Environmentally friendly coatings
- Supplied with full chain of custody in PEFC & FSC (Species specific)
- Available with textured surfaces or smooth
- Many profiles supplied end-matched, quicker installation, reduced material wastage
- Coating warranty
- Superb packaging for product protection and handling
- Minimal maintenance
- 100% usable
- Easy to install, basic tools required

To request a sample of these two new colours, call our sales team on 021 772 5511 or email us at sales@vincenttimber.co.uk
