

F I R E G U A R D

Code Requirements for such things as compartmented space, travel distance, mixed occupancy separation or even area separation walls, frequently result in the use of traditional swing doors to divide an otherwise unobstructed corridor. Recent changes to all of the model codes now permit the Won-Door FireGuard door to satisfy critical fire protection and means of egress requirements for these openings - without occupant load limitations.

With the microprocessor controlled and electronically supervised Won-Door FireGuard, school corridors remain clear and unobstructed. The result - lower maintenance costs, increased building utility and improved fire safety.

For more information contact your local Won-Door representative or visit our website at www.beehive-partitions.com
