

a luxury bath brand that is

BORN
FROM
ART

Artize

ART IN EVERYTHING

Being creators of art ourselves,
we cater to design connoisseurs
around the globe.

Consequently, our bathroom
products are not only designed
to surpass the highest
standards of luxury, quality,
and perfection but also seek
inspiration from high art ranging
across forms, time, and borders.

WHERE ART MEETS TECHNOLOGY

While an eye-catching piece of art does seem like the ideal way to add character to your bathroom, why should your bath fittings be any less than works of art? Beauty and functionality mingle at every turn in each Artize offering.

The result - an elevated bathroom experience where art and technology co-exist.

Replica of Trojan Horse - Canakkale Waterfront - Dardanelles - Turkey

Photo by Payton on Unsplash

The image features two abstract, elongated human figures in a dynamic, dancing pose against a soft, orange-hued sunset sky. The figures are rendered in a dark, matte finish, with their limbs extended in various directions, creating a sense of movement and grace. The lighting is warm and directional, highlighting the contours of the figures. The overall composition is minimalist and artistic.

MEET THE ARTISTS

Artize products are conceived by globally renowned designers who use Artize's 'craftsmanship' approach to create objects rooted in nature and top-notch design sensibility.

MICHAEL FOLEY

LISA BOSI

CLAUDIA DANELON

PARICHAY MEHRA

WINNING DESIGNS WORLDWIDE

Our craftsmanship-centric philosophy has helped us win a number of accolades, including the prestigious Red Dot, Good Design and if design awards, among others.

COLOUR IN ART

The role of colours in any form of art moves way past aesthetic fulfillment. A foremost dictator of mood, colour possesses the power to communicate feelings of happiness, sadness and the entire spectrum of emotions in between. Its role in any work of art cannot be undermined. This includes Artize's artisanal creations that come in varied colour finishes to help one feel further connected to their bath space.

ARTIZE SIGNATURE

The innovative, fluid, almost-sculptural pieces that define the Signature Collection remain unparalleled in their design and temperament alike. Bring home a slice of revolutionary contemporary art born of iconic artistic endeavours such as Art Deco-inspired minimalism and ancient Japanese pottery. Signature is bathroom luxury at its most opulent.

ARTIZE SELECT

Bold yet elegant, futuristic yet rooted in tradition, the Artize Select collection never fails to catch one's eye. Inspired by groundbreaking art movements, from the Dutch De Stijl to the Russian avant-garde, each creation in this diverse line is the epitome of form-meets-function.

TAILWATER

Echoing the sinuous form of a bird perched on the edge of a pool, the Tailwater captures the graceful elegance found in the natural world. The allusion to the ancient Japanese art of folding paper, origami, and the iconic crane motif lend another layer of meaning to the groundbreaking design.

TAILWATER

Tailwater | Taps

Inspired by nature and the elegant, fluid lines of contemporary architecture. Tailwater is a striking and iconic piece of bathroom fitting – a new, minimalist design classic. A zoomorphic, abstract image of a bird, perched on the edge of a pool, it is a beautifully engineered piece of industrial design.

CONFLUENCE

Proun 4 B - El Lissitzky - wikiaart.org | Public Domain

Much like its name, the oil on canvas Proun 4 B weaved into this range's arrangement is a 'confluence' of strong vertical and horizontal elements, created by Russian suprematist artist El Lissitzky. Confluence's biomorphic design channels the Zen energy of water streaming through a half-cut bamboo reed.

CONFLUENCE

Confluence

Quiet and harmony envelop the space around Confluence, a biomorphic design and zen mystery of natural inspiration. Like a reed of bamboo that channels water from rivers and brooks to pour it into a gentle, private stream, it calms and relaxes.

"Biomorphic design that delivers a Zen-like waterfall flow into your palms; a perfectly serene stream from the half-cut-bamboo style tap."

LEXA

Photo by Christopher Czernak on Unsplash

Tapered angles,
graceful curves, geometric precision - Lexa is a clear-cut Art
Deco descendent condensed into a range of faucets and
ceramics. It mirrors the movement's beautiful contradiction
of sharp, modern lines, and classic arches.

TUMBLE RAIN

Illustration by designer Ayushi Teotia

Peak summer.

The sun at its zenith.

The welcome embrace of cool water. With Tumble Rain by Artize, rediscover the simpler pleasures of a bucket bath. Relive the memories of the bathing ritual as a wave of water washes over you, a moment poignantly captured in this minimal illustration by designer Ayushi Teotia.

TUMBLE RAIN

Rediscover the thrill of bucket baths!

Tumble Rain has been carefully engineered to automate the entire effort involved in bucket baths. Simply set or mix the water temperature to your preference and use the diverter's on and off controls. The high-mounted 'bucket' fills automatically every few seconds and empties itself dramatically over you.

Technology brings back a simple joy

- Automated Tumbling
- No Scaling
- No Water Deposit
- No Bacteria
- A Green Product

SHOWERTRONIC

Composition V1 Theo Van Doesburg, Public Domain, Via Wikimedia Commons

A highly intelligent composition is exemplified in this equally intelligent, touch-based water-mixer system. With its state-of-the-art intelligent control software, Showertronic pays homage to the futuristic sculptures and installations of one of the world's most celebrated contemporary artists, Yayoi Kusama.

SHOWERTRONIC

The Advantage of Showertronic's Technology

For delivering water at the desired flow rate and temperature, Artize ShowerTronic offers several key advantages over other systems - advantages that come from being an Intelligent Valve Sensor System.

No cartridges: no small electric motors or other similar parts that need to be recalibrated or replaced. It runs on intelligent software.

Handles differential pressures: even up to 5 Bar, between hot and cold water inputs.

High-precision sensors: to check water flow rate and temperature every 50 milliseconds for instant control and cut-off, if require.

Safety: low voltage (12V DC) compliance for wet areas.

PIEZO-ELECTRIC
TECHNOLOGY

Durability: great for continuous use thanks to the absence of friction, IP 54 components and piezo-electric technology – which makes it India's first reliable, fully electronic thermostat.

Available colour :

CHR

I-Touch

An electronic touch interface based on piezo technology, the i-touch consists of different laminated layers, making it extremely robust, resistant and long-lasting with a high level of user-friendliness. The interface controls the shower flow rate and temperature, enables the water outputs desired by the user and executes the CPU's smart programs such as the start-up program, clean-up program, thermal disinfection program or warm up program.

CPU iV6 / 6 outs

Smart electronic device with digital reading and accurate, stable, thermostatic regulation of water temperature and flow rate at the consumption terminals. Designed to be integrated in showers, columns, cabins or bath areas.

Power Supply System

The system comprises of 12V DC power supply, a battery backup in case of lack of network voltage and a voltage peaks protection. Batteries are charged with the usual power supply, ensuring that they are always correctly loaded.

ARTIZE SELECT

RAINJOY

Hokusai's iconic print
The Great Wave Off
Kanagawa has been
a springboard for
Rainjoy, which, just as
the celebrated Japanese
artist, delights in
highlighting the glory of
water in motion. The
shower is accompanied
by its controller,
Thermatik, that is every
bit as instrumental in
simulating the ultimate
bathing experience for
the new era.

THE FLANK LEVER RANGE

Straight lines,
precise curves, and
no ostentation.

The Flank Lever Range
quartet featuring Angelo,
Leone, Travina, Kavalier
and Esplenda, hosts
characteristics typical
of De Stijl, Dutch for
'The Style'.

The revolutionary
movement in abstract art
kept only what was
necessary and nothing
that was superfluous -
a philosophy echoed in
the striking, bold, and
dramatic contours of
this range.

LE BLANC

wikiaart.org/en/laszlo-moholy-nagy/untitled - Public domain

Precise yet asymmetrical, Le Blanc follows closely in the footsteps of Constructivism ideals, which apart from influencing artists in its own era, also highly influenced proponents of the Bauhaus and De Stijl movements. Hungarian painter and photographer Laszlo Moholy-Nagy's Untitled work speaks to his love of Constructivism and subtly runs through Le Blanc's sharp edges.

SIGNAC

Elongated silhouettes and arched fittings define Signac's nature-inspired offerings. This trademark visual language can also be found halfway across the world, in the magnificent Gateway Arch monument of Missouri, United States that holds references to several constructivist motifs.

KITCHEN

Still Life by Paul Cézanne | Photo credit: National Gallery of Norway | commons.wikimedia.org/wiki/File:Paul_C%C3%A9zanne_-_Still_Life_-_Google_Art_Project.jpg

A still life painting by the Impressionist master Paul Cézanne offers a lesson in observing. The gradation in hues. The three-dimensionality of objects. Their careful placement. Kitchen tap by Artize aspires to a similar aesthetic precision, and aims at delivering joy with its calibrated form. Use it to know it.

WELLNESS

曉齋畫
)(丸

An ode to Japanese minimalism, the Wellness range by Artize, which includes bath tubs, steam cabins, whirlpool and the spa, will give you a rejuvenating experience, reminding you of a serene masterpiece such as Fish in a Whirlpool by Kawanabe Kyōsai. Wellness Range by Artize: where ergonomics meets water therapy.

Glossary

Adjustable Exposed Shower Pipe: An attachment to the exposed shower mixer which allows the showerhead to be adjusted to different heights.

Aerator: A device located in the tap spout that mixes air with water. It is made by using a restrictor that limits the flow of water while increasing water pressure.

Angle Stop: The shut-off valve between the water pipes and the tap. The inlet connects to the water supply pipe in the wall and it angles up 90 degrees to the tap.

Anti-Scald: A valve which monitors the temperature of water coming out to minimise the risk of scalding.

Basin Mixer: A basin tap that will mix hot and cold water and deliver it through a single spout.

Bath Filler: Like a basin mixer, a bath filler will mix hot and cold water and deliver it through a single spout.

Bath Shower Mixer: A bath tap fixture which incorporates a shower attachment.

Bath Tub Spout: An output device through which water flows to fill a tub. A valve controls the flow.

Bib Tap: A tap with a nozzle that is bent downward and supplied with water through a horizontal inlet.

Bidet: A low height washbasin, specially designed for washing certain parts of the body for personal hygiene.

Body Shower: A mini-shower head that delivers water from a vertical position in the shower. It often targets specific areas of the body and offers a precise therapeutic and invigorating massage.

Cartridge: A part of the valve that controls the On/Off function and allows water to flow.

Central Hole Basin Mixer: A one-piece fitting with two handles. Hot and cold water are mixed and delivered through a single spout.

Ceramic Disc: Two pieces of ceramic within the valve that open and close to allow control over flow volume.

Chromotherapy: A system of directing light sequences on or around the body to promote relaxation.

Cistern: The ceramic or plastic vessel that stores the water necessary for flushing a toilet.

Click-Clack Waste: A fitted alternative to a plug that you touch and click to drain the water

In-Wall Cistern: A cistern that is hidden from view behind a false wall.

In-Wall Shower Mixer: A shower control hidden within a finished wall, with only the operating lever and wall flange visible.

Couple Closet: A style of toilet where the cistern attaches directly to the pan.

Deck/Table Mounted Tap: A tap that sits on the rim of a washbasin or bath (as opposed to being wall mounted).

Diverter Valve: A valve designed to direct, or redirect, mixed water to a specific location.

Diverter: A shower control that will 'divert' the water flow to an additional hand shower or to an over head shower from a bath and shower mixer/diverter.

3-Inlet Diverter: Used where a customer has 3 pipelines installed in the bathroom: Hot (Geysers), Cold (Overhead Tank) and Fresh (direct from Municipal Corporation/Submersible).

Dual-Flush: A cistern that offers two flushing strengths - a full-volume flush or a half-volume flush to save water.

Flush: A hands-free, hygienic and water saving flush that's perfect for both public and private installations. It uses a beam of infrared light to switch on and switch off the water flow.

Face/Spray Plate: A plate with holes or slots through which water passes to form a spray with separate, definable jets or water droplets.

Fixed Head Shower: A shower head that is fixed to the wall with in-wall pipe work.

Fixture: Anything that accepts or discharges water or wastewater: taps, sinks, toilets, tubs. **Flange:** Non-threaded piece that goes over the pipe coming out of the wall and covers the hole in the wall.

Flow Rate: Measurement of water flow through a plumbing system in gallons per minutes (GPM) or gallons per hour (GPH).

Flush Valve: The valve located at the bottom of a gravity operated toilet flush tank that opens when the trip lever is actuated and closes when the tank has drained to the desired level. It usually contains an overflow tube as well.

Gasket: A flat piece of fibre or rubber used to provide a watertight seal between metal joints.

Gray Water: Wastewater from fixtures other than toilets.

Hand Shower: A detachable shower head with an integral handle and a flexible hose that allows the water spray to be directed onto any part of the body by hand.

Handle: The trim piece on the tap that turns the stem on the cartridge.

Hi-flow Diverter: It delivers a high-flow rate to quickly fill your bath. Ideal for use on the top floor of buildings where there's less water pressure.

Hard Water: Natural water containing impurities in various proportions. Traditional hardness is a measure of calcium, minerals or dissolved solids in a solution, measured in parts per million. Hard water generally ranges from 100 to 250 ppm.

Mono Block: A toilet in which the tank and bowl are manufactured as a single vitreous china fixture. Typically, Mono Block toilets have a lower profile than Couple Closet toilets.

O-Ring: A rubber washer that is round instead of flat. Used in valve stems to create a watertight seal.

Overhead Shower: Shower outlets which direct water onto the user from above the head

Pillar Tap: A tap which does not allow for temperature regulation by the user. Pillar taps are supplied with water through a vertical inlet.

Pop-up Waste: An alternative to traditional plugs, a pop-up waste comprises of a stopper connected by levers to a control knob on the tap. When the knob is pushed down the stopper is lifted to allow water to drain away. When the knob is pulled up the stopper seals the plug hole.

PVC: Acronym for Polyvinyl-Chloride. Usually refers to a rigid white plastic pipe made of this material, used for bathroom drain, waste and vent pipes.

Quarter Turn Taps: Taps which can be turned fully on or off by turning the handle through just 90 degrees. Ceramic discs inside the tap allow extreme controllability of water flow rate, provide a smooth, quiet action and great resistance to wear.

Reducer: A fitting that allows pipes of different sizes to be joined together.

Relief Valve: A valve that opens to relieve excess temperature and/or pressure in the system.

Scale: A thin coating or layer, usually of calcium, on the bottom of a tank or interior parts that may prevent heat transfer.

Sediment: The substance that settles at the bottom of a water tank.

Shower Arm: A component which supports a shower head and connects it to the water supply.

Shower Hose: A flexible pipe that connects the shower head and the shower control.

Shower Mixer: A shower that mixes hot and cold water and supplies it together to achieve the required temperature.

Shower Outlet: A fixture which allows water to be emitted in the form of jets or water droplets.

Single Lever: Taps which incorporate the opening, closing and mixing of hot and cold water with one lever.

Move the lever up to open the tap and down to close. To alter the water temperature, the lever is moved from left to right or vice versa.

Slide Rail: A vertical rail to allow height adjustment of a shower head.

Soft Water: Water that has been treated so that it has low mineral content.

Stop Cock: A simple, hand operated tap that turns the water flow off and on.

Tap: Tap is synonymous with tap. Tap also refers to the divergence of water from one fitting to another.

Tall Boy: A single lever basin mixer with a higher spout. Used for countertop basins where the tap is not installed directly on the ceramics, but on the vanity (or a separate shelf). The shaft must be longer for the water to flow into the basin at a comfortable distance, and it is significantly higher than the rim of the basin.

Thermostatic: Mixer taps that automatically maintain a constant temperature irrespective of the variations in the water pressure and the temperature of the hot and cold water supply. They have a cartridge or thermostatic element, a control for selecting the temperature and feature a safety stop that prevents scalding.

Thermostatic Bath & Shower Mixer: Gives precise and regulated control of the water temperature as well as flow. Sudden temperature changes are prevented, making the bath and shower experience consistent and enjoyable at all times.

Three Hole Mixer Tap: A tap fixture with separate hot and cold water handles to blend water through a third central spout.

Three-Handle: Three-handle taps also use separate handles for hot and cold water, but have an additional handle to divert the water from bath spout to shower head.

Trap: A curved section of drain that traps a small portion of water to prevent sewer gases from escaping into the bathroom. "P" traps and "S" traps are the types of traps most commonly found in bathrooms.

Two-Handle: Two-handle taps feature separate handles to control hot and cold water temperature.

Urinal: A plumbing fixture only for receiving liquid body waste (urine) which is then conveyed through a trap seal into a gravity drainage system.

Vacuum Breaker: A device that prevents the backward flow of contaminated water into clean water supply.

Valve: A device that regulates the flow, water temperature and/or volume of water.

Wall Bracket/Handset Holder: A device for holding a shower handset at a fixed height position such that the hands of the user are free. It also allows angular movement which enables the water spray trajectory to be adjusted.

Wall Hung: The toilet cistern is in-wall, behind a wall or inside bathroom furniture and the pan protrudes from the wall, above the floor. Basins and bidets can also be wall hung. The height can be fixed to suit the comfort of users.

Wall Mount Tap: Used with washbasins or baths which have no tap holes. The handle and spout protrude from the wall above the basin or bath and the pipework is hidden behind the wall.

Wall Mixture: Exposed wall mounted mixer that can divert water to either the spout or the shower head. **Wall Mixture Non-Telephonic:** Exposed wall mounted mixer that can deliver water through spout only.

Wall Mixture 3-in-1: Exposed wall mounted mixer that can divert water to three different outputs- spout, overhead shower and hand shower.

WC: A plumbing fixture that has a receptacle with water to receive liquid and solid body waste. Upon actuation (flushing), it discharges the waste through a trapway into a gravity drainage system.

GUARANTEE INFORMATION & MAINTENANCE

All Prices included in this catalogue either include VAT or the applicable sales tax of the country in which the product is being sold.

CE & EN Information

The CE marking on The Company's products is a declaration that the product complies with the essential requirements of the relevant European health, safety and environmental protection legislation. The CE marking on a product indicates to government officials that the product may be legally placed on the market in their country. This ensures the free movement of the product within EFTA and European Union single market and permits the withdrawal of the non conforming products by customs and enforcement authorities. The European Union's "new approach directives" are mandatory on all member countries to enact through national legislation. This legislation requires manufacturers to display a CE marking on their product, packaging and accompanying literature. Where a new approach directive is in force, it is (with few exceptions) an offence to place a product on the market without a CE marking.

Deliveries

All orders of £250 or more include free delivery. A £20 carriage charge will added to orders of less than £250. Deliveries should be inspected immediately after receipt; any discrepancies should be notified within 5 days, notifications received after this period will not be accepted. Goods supplied are subject to carriage charge *ask The Company for details*. Lead time direct to a reseller is up to 5 working days. 24 Hour Delivery is available subject to a carriage charge. Home delivery is also available subject to a carriage charge. All goods must be signed for by the customer.

Home delivery is also available subject to a carriage charge. All goods must be signed for by the customer.

Cleaning

- It is important to clean your product after every use. Wipe down all the glass and metal parts with a soft cloth.
- Do not allow limescale to build up in hard water areas.
- Ensure that any residual water on the product is removed after every use.
- Clean the product regularly using soapy water.
- Do not use abrasive products on any surfaces.
- Install enclosures in a well ventilated area.

Always read the instructions on the packaging; bathroom products are vulnerable to acid attack and some strong household cleaners including strong disinfectants, denture cleaners, hair dyes, wine making chemicals and photographic chemicals may contain acid. These materials may have a varying effect on the surface from black spots/streaks (which cannot be removed) to pitting the surface. Contact with these materials should be avoided. Never use steel wool, scouring pads, acid, alkali, vinegar or abrasives on your product. Any stubborn dirt should be wiped off carefully with a non-abrasive cloth, be careful not to scratch the product.

Shower Enclosure Adjustment

This is the min and max adjustment of the actual enclosure. These are the adjustment dimensions of the actual door excluding the tray. Therefore, these are the dimensions to follow when installing an enclosure in a wetroom application without a tray.

The guide below may be helpful in taking measurements to determine the shower door or enclosure size required. Dimensions given in this publication are in millimetres, are approximate and may vary with adjustment. They are subject to change without notice. Please note that when a tray is fitted it is essential that the tray is level before any doors or enclosures are fitted. Uneven trays may lead to leakages and would invalidate our guarantee.

Bath Screen Information

Bath screens are not designed to fit on baths with stepped fronts, roll top rims or integral soap dishes. Fitting of screen on baths which have a raised headrest or shape is not recommended. Screen must not be impaired by bath handles. Bath screens are not designed to fit on baths with stepped fronts, roll top rims or integral soap dishes. Fitting of screen on baths which have raised headrests or shapes is not recommended. There must be no items causing obstruction with the seal and bath, as any of the above may cause leaks. When choosing your bath screen, please ensure that if your bath has bath handles, they do not interfere with the bath rim area where your screen will be placed. When choosing an in-swing or folding bath screen, please ensure your swing area is not interfering with any brassware or internal shower features. Similarly, when choosing an out-swing, please ensure the out-swing area is free from any obstructions.

Important Shower Tray Information

Although shower door and enclosure sizes are related to tray sizes it is important to note that most shower trays are tiled down to the rim, often over an 'up-stand'. The finished installation space may be less than the nominal tray size. Shower units are made to suit this remaining space.

Tray Finish Min - Max

The tray finish applies when fitting a door and a tray. These are the minimum and maximum dimensions that a shower door or enclosure will fit using standard wall profiles.

Tray Finish To find the correct tray finish dimension:

In a recess: Measure from the finished, tiled wall to the opposite finished, tiled wall. In a corner: Measure from the finished, tiled wall to the edge of the tray. Note: If the wall/walls are leaning in, this will further reduce your tray finish. Please ensure that the size of shower tray is as per your order before installation. You must inspect the product thoroughly before installation. Fitting the product is acceptance of quality. Tray heights may vary due to manufacturing tolerances. Where your shower tray is not fully enclosed please ensure that your panel is at least $\frac{3}{4}$ of the length of your tray size. Please ensure that the shower head is not positioned over the waste as this may restrict flow rate.

Returns No return of goods will be accepted by The Company without prior authorization and compliance with our returns procedure. In the event that the customer returns any goods which are not defective, such goods will be accepted by The Company only if they are returned to The Company in an undamaged resalable condition which requires that the goods are unused and contained within their original unopened and undamaged packaging.

After The Company has inspected the goods, The Company reasonably considers that the goods are in a condition which is no worse than the condition in which the goods were delivered to the customer; and the customer has returned the relevant goods to The Company within 5 days of the delivery date. In the event that the Customer wishes to return non-defective goods to The Company following the expiry of the 5 day period, The Company will have absolute sole discretion as to whether it shall offer a refund to the customer in respect of such goods. In relation to any returns made for non-defective goods. The Company will deduct a 25% fee in the first instance; however, we reserve the right to deduct up to 40% of the price paid as a discretionary restocking fee plus the cost of carriage. This is in order to cover The Company's administration and restocking costs. The Company will not accept any return of (or issue any refund or credit in respect of) non-faulty goods more than 5 days following the delivery date. (If a return of non-defective goods has been agreed by The Company, it is up to the Customer to transport these goods back to the Company's premises at their own cost. The company may arrange transport on your behalf, however, charges will apply and shall be deducted from any monies owed in respect of the return).

General

All products are supplied complete with full installation instructions and the necessary fixings. Product descriptions do not imply the use of precious or valuable materials. Glass shattering and parts subject to wear (e.g. cartridges) are not covered by the 10 year guarantee. Trays shown in this catalogue are for illustrative purposes only. The positioning of all showering heads in the brochure is for illustrative purposes only. All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon the Company. Prices were correct at time of print. V.A.T. is calculated based on the country in which the goods are sold. Due to circumstances beyond our control, prices may be altered including changes to the rate of V.A.T. Due to our policy of continuous improvement, we reserve the right to amend prices, specifications and designs without prior notice. Images are for illustrated purposes only. The colours and finishes shown in the catalogue are as accurate as possible within the limits of the printing process.

Liability

In the event of any breach of The Company's obligations the remedies of the customer will be limited through damages. Except as set out in these conditions, all warranties, conditions and other terms implied by law (whether by statute, common law or otherwise), are to the fullest extent permitted by the law, excluded from the contract. The Company's maximum aggregate liability arising out of or in connection with a contract, whether in a contract, tort, misrepresentation under statute or otherwise, howsoever caused including any liability under an indemnity contained in the contract and/or arising from a breach of, or a failure to perform or defect or delay in performance of, any of The Company's obligations under the contract and/or any defect in any of the goods supplied under the contract and/or any use made or resale of any such goods by the customer or of any product incorporating any of such goods shall be limited to the aggregate price paid or payable under the contract.

The Company shall not have any liability to the customer for any loss of profit (direct or indirect); loss of revenue, loss of production or loss of business (in each case whether direct or indirect); loss of goodwill, loss of reputation or loss of opportunity (in each case whether direct or indirect); loss of anticipated saving or loss of margin (whether direct or indirect); liability of the customer to third parties (whether direct or indirect); consequential or special loss; arising out of or in connection with the contract, whether in contact, tort, misrepresentation under the statute or otherwise, howsoever caused including by negligence and/or arising from a breach of, or a failure to perform or detect or delay in performance of, any of The Company's obligations under the contract. Nothing in the contract shall operate to exclude or restrict The Company's liability (if any) to the customer for breach of its obligations arising under section 12 of the sales of good act 1979; for breach of its obligations arising under section 2 of the supply of goods and services act 1982; for death or personal injury resulting from its negligence; for its fraud or fraudulent misrepresentation; or for any matter for which it is not permitted by the law to exclude or limit, or to attempt to exclude or limit, or to attempt to exclude or limit, its liability.

Conceived back in 1960, the Jaquar Group has been built on the platform of highest quality standards, aesthetics and with the intent of exceeding customer expectations. Today, the Jaquar Group caters to premium and luxury bathroom segments, with Jaquar and Artize brands respectively, for residential and commercial segments.

Disclaimer:

- We as a brand reserve the right to change any product specification at its own discretion, where improvement can be effected in design, development and dimensions. Although the information shown in this catalogue is updated to the extent possible, it is advised to consult our local representative for latest technical and other updates,
- The prices are subject to change without notice and those ruling at the time of supply will be charged

Celebrating nature and the movement of water,
Artize ushers in a new era in bathroom luxury that is
#BornFromArt.
