# ULTIDRIVE

The ultimate long-lasting driveway surface

*Designed to resist the long term effects of daily parking and power assisted turning, ULTIDRIVE is a high performance asphalt with a smooth and highly durable finish that keeps its premium appearance for longer.*

To find out how **ULTIDRIVE** can help you achieve longer-lasting results, quickly and cost effectively call **0800 1 218 218**

**TARMAC.COM**

## DURABLE FINISH

High grade aggregates interlock to provide superior resistance to the scuffing associated with power-assisted turning.

## IMPROVED RESISTANCE TO SUMMER SOFTENING

An advanced modified binder reduces softening in hot weather and enhances the toughness of the surface.

## IMPROVED FUEL RESISTANCE

The advanced modified binder also gives enhanced resistance to temporary fuel and oil spills compared to conventional asphalt surfacing.

## LASTING COLOUR

Available in black, or red. ULTIDRIVE also incorporates a complementary aggregate for longer lasting colour that resists surface wear.

## LOWER MAINTENANCE

Delivers a smooth, monolithic durable finish that reduces the impact from weed growth, requiring far less maintenance than alternative block paving solutions.

## ULTIMATE VERSATILITY

Available in 10mm or 6mm, ULTIDRIVE provides a versatile solution for multi use pedestrian surfaces, estate roads and car parks.
